SYLLABUS

1. Information regarding the programme

1.1 Higher education institution	Babes-Bolyai University
1.2 Faculty	Faculty of Mathematics and Computer Science
1.3 Department	Departament of Mathematics
1.4 Field of study	Mathematics
1.5 Study cycle	Bachelor
1.6 Study programme / Qualification	Mathematics-Computer Science

2. Information regarding the discipline

2.1 Name of the discipline		Algebra 1 (Linear Algebra)					
2.2 Course coordinator		Assistant Professor PhD. Cosmin Pelea					
2.3 Seminar coordinator		Assistant Professor PhD. Cosmin Pelea					
2.4. Year of study	**1**	2.5 Semester	**1**	2.6. Type of evaluation	**E**	2.7 Type of discipline	**Compulsory**

3. Total estimated time (hours/semester of didactic activities)

3.1 Hours per week	4	Of which: 3.2 course	2	3.3 seminar/laboratory	2
3.4 Total hours in the curriculum	56	Of which: 3.5 course	28	3.6 seminar/laboratory	28
Time allotment:					hours
Learning using manual, course support, bibliography, course notes					28
Additional documentation (in libraries, on electronic platforms, field documentation)					20
Preparation for seminars/labs, homework, papers, portfolios and essays					28
Tutorship					14
Evaluations					4
Other activities:					-
3.7 Total individual study hours		94			
3.8 Total hours per semester	150				
3.9 Number of ECTS credits	6				

4. Prerequisites (if necessary)

4.1. curriculum	
4.2. competencies	

5. Conditions (if necessary)

5.1. for the course	
5.2. for the seminar /lab activities	

6. Specific competencies acquired

Professional competencies	C1.1 Idetifying the notions, describing the theories and using the specific language C2.3 Applying the adequate analytical theoretical methods to a given problem.
Transversal competencies	CT1. Applying some rules of precise and efficient work, showing a responsible attitude regarding the scientific domain and teaching training for an optimal and creative development of the personal potential in specific situations, respecting the deontological norms.

7. Objectives of the discipline (outcome of the acquired competencies)

7.1 General objective of the discipline	To introduce the basic notions of linear algebra.
7.2 Specific objective of the discipline	To introduce some basic results on vector spaces, matrices, systems of linear equations, eigenvalues, eigenvectors and quadratic forms.

8. Content

8.1 Course	Teaching methods	Remarks
1. Groups. Rings. Fields.	Interactive exposure Explanation Conversation Didactical demonstration	
2. Polynomial rings. Matrix rings	Interactive exposure Explanation Conversation Didactical demonstration	
3. Determinants. The inverse of a matrix	Interactive exposure Explanation Conversation Didactical demonstration	

4. The rank of a matrix. Systems of linear equations	□ Interactive exposure □ Explanation □ Conversation □ Didactical demonstration	
5. Elementary operations on a matrix. Applications	□ Interactive exposure □ Explanation □ Conversation □ Didactical demonstration	
6. Vector spaces. Subspaces.The generated subspace	□ Interactive exposure □ Explanation □ Conversation □ Didactical demonstration	
7. Linear maps	□ Interactive exposure □ Explanation □ Conversation □ Didactical demonstration	
8. Test	□ Interactive exposure □ Explanation □ Conversation □ Didactical demonstration	
9. Bases	□ Interactive exposure □ Explanation □ Conversation □ Didactical demonstration	
10. Dimension	□ Interactive exposure □ Explanation □ Conversation □ Didactical demonstration	
11. Matrices and linear maps	□ Interactive exposure □ Explanation □ Conversation □ Didactical demonstration	
12. Eigenvectors and eigenvalues	□ Interactive exposure □ Explanation □ Conversation □ Didactical demonstration	
13. Diagonalisable matrices. Hamilton-Cayley Theorem	□ Interactive exposure □ Explanation □ Conversation □ Didactical demonstration	
14. Bilinear and quadratic forms.	□ Interactive exposure □ Explanation □ Conversation □ Didactical demonstration	

Bibliography

1. R. COVACI, Algebra si programare liniara, Litografia UBB, Cluj-Napoca, 1986.

2. S. CRIVEI, Basic Abstract Algebra, Ed. Casa Cartii de Stiinta, Cluj-Napoca, 2002, 2003.

3. I.D. ION, N. RADU, Algebra (ed.4), Editura Didactica si Pedagogica, 1990.

4. C. NASTASESCU, I. STANESCU, C. NITA, Matematica, Elemente de algebra superioara, Editura Didactica si Pedagogica, Bucuresti, 1995.

5. I. PURDEA, I. POP, Algebra, Editura GIL, Zalau, 2003.

8.2 Seminar / laboratory	Teaching methods	Remarks
1. Groups. Rings. Fields. Review.	Interactive exposure Explanation Conversation Didactical demonstration	
2. Determinants.	Interactive exposure Explanation Conversation Didactical demonstration	
3. The rank of a matrix	Interactive exposure Explanation Conversation Didactical demonstration	
4. The inverse of a matrix	Interactive exposure Explanation Conversation Didactical demonstration	
5. Systems of linear equations	Interactive exposure Explanation Conversation Didactical demonstration	
6. Vector spaces.	Interactive exposure Explanation Conversation Didactical demonstration	
7. Subspaces. Generated subspace	Interactive exposure Explanation Conversation Didactical demonstration	
8. Linear maps	Interactive exposure Explanation Conversation Didactical demonstration	
9. Bases	Interactive exposure Explanation Conversation Didactical demonstration	
10. Dimension formulas.	Interactive exposure Explanation Conversation Didactical demonstration	

11. Dimension and generated subspaces.	□ Interactive exposure □ Explanation □ Conversation □ Didactical demonstration	
12. Matrices and linear maps	□ Interactive exposure □ Explanation □ Conversation □ Didactical demonstration	
13. Eigenvectors and eigenvalues. Diagonalisable matrices. Hamilton-Cayley Theorem	□ Interactive exposure □ Explanation □ Conversation □ Didactical demonstration	
14. Bilinear and quadratic forms.	□ Interactive exposure □ Explanation □ Conversation □ Didactical demonstration

9. Corroborating the content of the discipline with the expectations of the epistemic community, professional associations and representative employers within the field of the program

- □ The course presents notions which often appear in other undergraduate courses.
- □ The course offers a sufficiently general background for some highschool algebra topics and the opportunity to develop some problem solving skills useful for further teaching activities.

10. Evaluation

10.4 Course	Knowledge of basic concepts	Tests	25%
	Knowledge of basic results	Final exam.	25%
10.5 Seminar/laborator	Examples and problem solving	Final exam.	50%
10.6 Minimum performance standards			
The final grade must be at least 5.			

Date	Signature of course coordinator	Signature of seminar coordinator
27.09.2021	Assist. Prof. PhD. Cosmin Pelea	Assist. Prof. PhD. Cosmin Pelea

Date of approval Signature of the head of department

Prof.PhD. Octavian AGRATINI
